* If a name appears only in a foot-note or a reference, the appropriate reference symbol is attached to it; e.g., Birge, R. T. [6]. Other numbers refer to pages. The entire group of pages in a study of an author's work is given, even though the author's name does not appear on all of them. A *d* indicates that a definition is given on that page.

INDEX *

Abnormal values, 76

INDEX OF EQUATIONS

Equation	Subject	Page
1–9	Theory of errors	5
10–11	Least squares	7
12–17	Least squares	8
18–19	Least squares	9
20–21	Discordance dubiety	10
22	Diameter of source, Fizeau method	18
23–25	Equations, Fizeau method	19
26	The *H*-formula, Cornu's work	31
27–33	Derivation of erroneous *K*-formula	31
34	Perrotin and Prim's erroneous formulas	41
35, 36	Acceleration of wheel, Perrotin and Prim	44
37	Comparison of observations with theory	45
38–42	Effect of variation of acceleration with q	46
43	Equation, Newcomb's work	47
44	Torque for elastic distortion	51
45	Force for elastic distortion	52
46	Periodic terms in speed of mirror	52
47–56	Torque and force for sinusoidal change in speed	53
57–63	Effect of catenary, Michelson's tape	57
64–66	Measuring of displacement, Michelson	59
67–68	Michelson's formulas of 1924	67
69	Anderson's formula	83
70	Effect of delay at reflection	89
71, 72	Diameter of source, Fizeau method	90
73–78	Equations for Fizeau method	91
79–81	Equations for Fizeau method	92
82–92	Equations for Fizeau method	93
93–101	Equations for Fizeau method	94
102–108	Equations for Fizeau method	95
109–113	Effect of sinusoidal variations	98
114–118	Effect of sinusoidal variations	99
119–129	Speed and acceleration of wheel	101
130	Time of transit	103
131	General expression for angular position of mirror	103
132–135	Period of impulses nearly multiple of free period	105
136–139	Period of impulses much smaller than free period	106

Ionization potential, 116, 118, 119

Kiess, C. C., 115
King, A. S., 115, 123, 126

Laporte, O., 113, 114, 117

Meggers, W. F., 113, 115
Multiplets, number, 114
  predicted solar lines in, 127

Pentads, high even, 119–121
Predicted lines in solar spectrum, list, table C, 170
  method of study, 126–129
  probability of accidental coincidences, 129, 130
  reality of accepted cases, 130, 131
Probability of accidental coincidences with solar lines, 129, 130

Quintet terms, analysis, 119, 122, 123

Rydberg denominators, 118–120

Septet terms, analysis, 119, 121, 122
Singlet terms, analysis, 117, 124, 125
Solar spectrum—lines of Fe I, apparent absences, probably illusory, 132
  number of lines present, table 24, 132
  observed lines present, 132
  predicted lines probably present, table C, 170
  Revised Rowland Table, 115
  source for iron spectrum, 126
Sources, intensity, 115
  table B, 139
  temperature class, 115
  wave-length, 115

Spectral series, 118, 119
Structure of spectrum, 116–126
Swings, P., 117

Temperature classification, list, table B, 139
  sources, 115
Terms, spectroscopic; list, table A, 134
  number, 114
  predicted odd terms, 121–125
  Zeeman g-values, tables A, E, 134, 203
Triads of terms, 122–125
Triplet terms, analysis, 117, 119, 123, 124

Unclassified levels, 116, 125
Unclassified lines, 126
  table 19, 127

Walters, F. M., Jr., 113, 114, 116
Wave-lengths, accuracy, 115
  bibliography of table B, 169
  compilation, 115
  sources, 115
  table B, 139

Zeeman effect, 181–183
  method of analysis, 181
Zeeman g-values, accuracy of final values, 182
  comparison with Landé's theory, table 26, 182
  correction of preliminary determinations, 182
  final values, 183
  perturbations, 183
  table E, 203
Zeeman patterns, observed, 181
  table D, 184
